## The Bulletin. TUESDAY.

Major A. W. Edwards, of the Macoupin Free Democrat, who is the "infant" of the Illinois Press association, is a prominent candidate for clerk of the House of Representatives. Edwards is a very clever, big-hearted gentleman, and since the office must be filled by a Radical, we are for him.

Ir is generally believed that General Schurz cannot long maintain his equivocal relations to the Radical party. He must either not with or against the party. There is no middle ground.

The prominent Republican journals of the country (with a very few exceptions) express the belief that Schurz's split with the administration is irreconcitable, and that the party might as well tamble him overboard, first as last,

RADIUAL strategists look upon the growing strength of the Democratic representation in the Senate with an alarm which they illy conceal. They fear the early destruction of their two-thirds majority. Honce we see an indecent haste in the purpose to admit new States. Colorado and New Mexico each with a population of less than two-thirds of a congressional ratio, will most likely be admitted soon after the re-assembling of Congress.

Who doesn't lonew that if there were certainty that Colorado and New Mexico would send Democratic Senators, the proposition to admit them as States would be denounced by Radical Congressmen as prepasterous, outrageous?

THE New Hampshire Democracy have long been weakened by divisions and contentions, particularly among its leading men. The general aspect of the political situation has suggested the idea of a reconciliation, and on Saturday last, seventy-ave of the most primite i m of the State met 's Concord, and adopted measures that will soon bring about the desired settlement. It is claimed that New Hampshire becomes Democratic the very moment the party divisions are healed and the differences adjusted.

As a step in the way of adjustment it is proposed to consolidate the Patriot and the Pronte, two rival and influential Democratic organs.

THE neighboring village of Carbondale-within whose limits no intoxicating liquor is sold, but where an immense amount is consumed-has a real sensation. The City Judge, William A. Lemma (and a very clever gentleman, by the way) recently horsewhipped one Dr. J. D. Freeman, a banker, right in the streets of the city, in the broad glare of day, and in the presence of a large number of highly interested spectators.

The New Era, in giving an account of the affair, says that possibly Freeman didn't get a liek amiss. It insists however, that Lemma was not the man to administer the castigation, and, thereupon proceeds to give Lemma a word-lashing that would very nearly equal Freeman's cowhiding, but for the fact that the editor permits his own personal ill will to crop out quite pointedly, in nearly every line.

THE closing debate on Morton's San Domingo resolution was sharp and pointed, and very perceptibly spiced by personalities. A notable passage between Morton and Bayard is thus reported The former having severely commented upon the criminal code of Delaware, Mr. Bayard replied as follows:

The Indiana senator has sneeringly pro-posed that we should export one of the in-stitutions of our penal code, the whipping-post, from Delaware to the island of San Domingo. Well, sir, it was his proposition. and there may have been some lurking sense of the fitness of things that produced the remark. Our laws in Delaware do meet with very little approval of a very large class of people. We whip thieves, and apply the lash severely to the assailants of female chastity."

As Morton is a notorious libertine he felt Bayard's thrust very keenly, and, desiring a modifidation of it, declared that in referring to the whipping post of Delaware it was foreign to his purpose to wound Mr. Bayard's feelings. Mr. B's recantation was worse than his insinuation. He simply said that "it afforded him pleasure to withdraw so much of his remarks as the Indiana Senator felt had a personal application capable of learning from experiences to himself." That and nothing more. Federal troops were stationed at all the Canada West.

THE New York Ecening Post lets prominent points in the State, Radical one of the cats out of the San Domingo judges carried things with a high hand, wallet in this wise: Early in 1869 yet against these odds the Democracy the commander of the United States have achieved a complete and sweeping steamer Nipsic, then at Port au Prince, triumph. The election of four Demowas directed by the President through crats to the Forty-second Congress is the Secretary of the Navy, to inform conceded, and there is a chance for the himself as to the moral, political, finan-cial and agricultural condition of San isn't it? Domingo, that the present annexation scheme might be inaugurated and backed

it would prove disactrous to the scheme which the President had already set his

If the purchase of San Domingo, will, as it now promises to, disrupt the Radical party, for the country's sake let the purchase be made. If every one of the 120,000 semi-barbarous blacks that inhabit that island become chronic paupers on our hands, better that than the re-election of Grant to the Presidency.

a German, is proposing to unite the oppo-sition to Logan on simself. The Demo-reason, and which is born of prejudice." crats, however, say they will not support Koerner. They want the Republican minority to go with them for Judge Lawrence, Hon. Joseph Medill, or some other citizen of like ability.

In addition to this we see it stated that President Grant is pringing ais influence to bear against Logan and in favor of Oglesby. It seems that Logan foiled Orville Grant's purpose to squelch an Illinois revenue officer, against whom he had preferred charges of corruption and malfeasance in office. Orville Grant is a brother of Ulysses. Hence, the President in "legging" for Ogle by, only shows Mr Logan that Orville Grant has a "big brother" that does the fighting for the whole family.

While we do not consider Grant's opposition as very formidable, we are constrained to believe that other causes are so operating as to diminish Logan's chances of election, every day. We do not know that Oglesby gains what Logan loses, but that the latter is constantly losing ground is undeniable.

If Governor Palmer would "decline" oftener and with increased emphasis, we should at once conclude that he is "the coming man." In exact proportion with the earnestness of his avowal not to be a candidate, are the probabilities that he will be voted for and elected. We are inclined to believe that the Democratic representatives from Egypt hold that the Governor is an able and honest man, Western in sentiment, and in favor of the revenue and tariff reforms that form such prominent planks in the Democratic platform. Believing this they would, of course, vote for him as the least of all the Radical evils yet named. Logan is a demagogue, politically corrupt, and of very indifferent ability. Oglesby is coarse, violent and fanatical; but infinitely Logan's superior in point of ability. That either of these men can command a half dozen Democratic votes is not to be supposed, and without Democratic votes it is scarcely possible that either can be elected.

THE GEORGIA ELECTION.

If the returns received from Georgia may be relied upon, the Democracy have achieved a most signal vistory. Of the even congressional districts in the State the Democrats have carried the First Third, Fifth and Seventh-the Fifth by 4,500 and the Seventh by 3,000 majority. The Legislature will be largely Democratic, thus insuring the election of a Democratic U. S. Senator, probably Hon, Herschell V. Johnson.

If this result do not teach the Presideat that the people will no longer submit to military dictation, then he is in-

## THE PRIZE RING.

by undoubted statistics. The officer obeyed his instructions and made an elaborate report, concluding with the remark that the purchase or annexation of the San Domingo portion of the island would prove a fruitful source of expense, vexation and trouble, and in no view of the case could he recommend such a step. This report was never permitted to see the light, for fear it would prove disastrous to the scheme ring, neither man will escape without at ring, neither man will escape without at least one black eye to remember the occasion by. As no one seems to question Mace's good faith, we will not speak of him, but an yone who will take the trouble to look upon the matter in the proper light will be convinced that Coburn has much more to gain in fact, everything—
by fighting than by allowing the match
to fall through, and we fancy there are
precious few who will deny him the credit
of being shrewd enough to keep a sharp
look-out for his own interests. We are of the belief that a gladiatorial contest between these ring warriors will not prove so much of as 'certainty' as the adherents THE SENATORIAL OUTLOOK.

The latest reference to the Illinois Senatorial contest is the following. It was telegraphed from Chicago on Saturday last:

"General John A. Logan is in the city canvassing his prospects for the United States Senatorship. He thinks there is no doubt of his nomination in caucus, but has fears that enough Republicans will remain out of the cavcas be effect his defeat. This programme is strongly talked of by his opponents, and will probably be carried into effect.

It is said that General Koerner, who is a German, is proposing to unite the opposition to Logan on himself. The Demo-

HAIR REMURATIVES

NEW DISCOVERY !! PHALONS

Salvation for the Hair.

For Restoring to Grow Hair its Original Colo

PHALON'S "VITAMA" differs utterly from all the "dyes,"
colorers," and "restorers"
(?) in use. It acts on a
totally different principle. It
is limpid, fragrant, and perfectly innocrous precipitates no muddy or flactulent mat-ter, requires no shaking up, and communicates no stain to the skin or the lines. No paper curtain is necessary to conceal its turbit appearance, for the simple reason that it is not turbid. It is, to all intents and purposes, ANEW DISCOVERY in Toil & Chemistry.

Phatan's "VITALIA" is warranted to effect a change in the color of the hair within 10 days after the first applicacarefully observed. IT IS AS CLEAR AS WATER!

AND WAS NO SEDIMENT. Price, One Dollar per Box.

CONT THING TWO BUTTLES. SOLD BY ALL DRUGGISTS. If your Druggis has not "Vitalia" on hand write, en-closing \$1.00 and we will

forward it immediately. PHALON & SON, 517 Broadway, N. T.

The Amperichable Perfume.

As a rule, the performes now in use have no per namency. An hour or two after their use, there m no trace of perfume left. How different is the resuit succeeding the use of Murry and Lanman's Florida Water. Days after its application the handkerchief exhales a most delightful, delicate and agreeable tragrance. mar4deodly

DE. SCHENCK ADVISES CONSUMA TIVES TO GO TO FLORIDA IN

HAVING for the last thirty-five years devoted my whole time and attention to the sindy of lung discusses and consensation. I feet that I understand fully the consection of control to the sindy of lung discusses in a consensation. I feet that I understand fully the consection of the limit of the last of the last to healthy coundness. The first and meet important step is, for the patients to avoid taking doid; and the best of all piaces on this continent for this purpose, in winter, is Florida, well down in the State, where the semparature is regular, and not subject to each restations as in more mortern latitudes. Paintins in a point I can recommend. A good botells kept these by Peterman. Last where I am weveral promise there where lengs had been badly discussed, but who, under also healing influence of the climate and my medicines, were getting well.

One hundred miles farther down the river is a point which I would prefer to Taintin, as the temperature is more even, and the air dry and bracking followable and Engaperios are located there. Should give a decided prefer where to Biclionville: It is two miles from tree or late, and it seem almost impossible to take cold there. The tables in Florida might be better, and patients complain at times but that is a good air, as it indicates a return of appaties; and, when this is the case, they generally mereas in firsh, and then the lungs must heal.

Jacksonville, Hilbernia, Green Cove, and many other piaces in various parts of Florida, can be asfer recommended to concumptive in winter. My reasons for onlying so are, this patients are less liable to take cold there than where there is a less even temperature: and it is not necessary to say, that, where a consumptive person expose himself

nestly recommended.

For fifteen years prior to 1865, I was professionally in New York, Beston, Baltemore, and Philadele sily in New York, Boston, Battriore, and Philades-phia every week, where I saw and examined on an average five hundred patients a week. A practice on extensive, embracing every possible phase of lung disease, has enabled the to understand the disease railty and hence my castion in regard to taking cold. A person may take wast quantities of "Schemet's Pulitteing Syrue, Sewerd Torke, and Mandreke Phila," and yet die if he does not avoid taking cold.

Mandrake Pilia, "sud yet die if he does not avoid taking cold.

In Florida, nearly essayhody is using Schench's Mandrake Pilia; for the climate is more likely to produce bilious habits than more northern latitudes. It is a well-consbiblined fact, that natives of Florida rarely die of consumption, capecially those of the nouthern part. On the other hand, in Mew England, one-third at least of the population die of this carribin disease. In the hiddle States, it does not prevail plumptry, pilif there are many thousands of cases there. What a vast percentage of life would be saved if consumptive were as easily alarmed in regard totaking fresh colds as they are mount taken they have reducing smooth to be liver will wear of in a few days. They may no attention to it, and house it haps the committee for motors and any charge it haps the committee for motors and any and house it haps the committee for motors and any charge it haps the committee for motors and any and house it haps the committee for motors and any and charge it haps the committee for motors and any and

they are evolutions shough to believe will wear off
in a few days. They pay no attention to it, and
hence it have the fourmations for another and anther still, until the longs are diseased beyond all
hope of store.

By advice to persons whose image are affected,
creaninghity, the law in a moch of schement's rulmonic hyrup, Schangt's Beaused Tonic, and
misset a Handrahe Fills, and go to Florada. I comcomment these perturbation redictions, because I am
thoroughly acquained with their action. I know,
that, where they are used in strict accordance with
my directions, they will do the work that is required. This accomplished, nature will do the rest.
The physician who prescribes for cold, dough, or
night awasis, and then advises the patient to walt
or ride out every day, will be aure to have a corpse
on his hands before long.

My plants, to give my three medicines in accordance with the printed directions, except in some
mass where a freer use of the Mandrake Fills is
becomery. My object is, to give tone to the stomach,—to get up a good appetite. It is always a
good sign when a patient beginn to graw hungry:
I have hopes of such. With a relieb for food, and
the granification of that reiths, comes good blood,
and with it more fiest, a high is plosely redowed
by a heating of the Jongs,—then the complet lossen
and abstes, the creeping chilts and elaminy hight
awasts to longer preserves and samey, and the
patient gets well, provided he avoids taking cold.

Now, there are many consumptives who have
not the means to go to Florida. The question my
there is. By advise to auch a, and year has been,
to stay in a sarm conn during the winter, with a
temperature of about seventy degrees, which
should be kept regularly at that point by means of
a thermometer. Let such a patient take his exercine withm the limits of the ream by walking up
and down as much as his arength will permit, in
erder to keep up a healthy creaniation of the blood.
I have cured thousands by this system, and can do
a again. Consumption if as eas

be almost certain to find some poor consimptive who has been peaced from the very laws of drain by their use.

Bo far as the Mandrake Pills are concerned, everyloady about keep a supply of them on hand. They act on the liver better than calound, and leave mone of its hurthi effects behind. In fact, they are excellent in ail cases where a purgative modicine is required. If you have partaken too freely of fruit, and distribute essues, a dose of the Mandraken will cure you. If you are subject to sick headson, take a dose of the Mandraken will cure you. If you are subject to sick headson, take a dose of the Mandraken will care you. If you are subject to sick headson, take a dose of the Mandrake, and they will relieve you it two boars. If you would obviate the affect of a change of waster, or the too free indulgence in fruit, take one of the Mandrake every aight, and you may plea, pluma, peaches, or core, without the risk of being made sick, when They will protect thous who live in damp situations against chills and feerers. Try them. They are presently harmizes. They can be you condensy.

I have abandoned my profugignal visits to Boston and New York, but continue to the patients at my office, No. Is North faint fainest, Philadelphia, every fainted, from 1, art, to 5, s.s., Those who wrish a thorough examination with the Respiremeter will be charged five dulars. The Respiremeter declares the uxect condition of the links; and position can peaking learn whether they are earlied or not. But I deare it distinctly understood, that the value of my madeleines depends entirely upon their being taken strictly according to directions.
